

# Litigation Made EASY

**Korbitec Inc.** develops time-saving, easy-to-use document automation software and has served the Canadian legal industry for over 10 years.

## How Does It Work?

ACL automates the entire process of creating court documents and standard correspondence.

Enter all client, opposing party and court information once only. Choose a document to assemble and fill in the dialog boxes when prompted. With one additional mouse click, the document is assembled into Microsoft® Word where it can be proofread, edited as required and saved.

## What Is In ACL?

- *Rules of Civil Procedure* Forms 4 thru 78
- Estate Forms
- Construction Lien Forms
- Federal Court Forms
- Bankruptcy Forms
- Small Claims Forms
- FSCO Forms
- 15 Common Motions
- Releases and Directions
- A Pre and Post-Judgment Interest Calculator
- 60 Pre-written Letters

## Can It Be Customized?

All ACL court forms and letters are Microsoft® Word templates that can be modified by the user. Firms can use the program as is or choose to customize any of the court documents or letters to suit their own style preferences and wording. Firms may also add and organize an unlimited number of their own

precedent clauses using the Custom Content Manager feature. The user can then choose those clauses from ACL to assemble a complete document such as a Statement of Claim or Statement of Defence without the need for any further editing in Microsoft® Word.

## What Is The Cost?

ACL licenses on a “per file” basis. There are no workstation or lawyer licensing costs, and ACL can be installed on any number of workstations. The file license fee is disburseable to your client. Many firms choose to recover all or a portion of their licensing costs. Use of ACL is subject to a minimum use policy. Please contact our sales department for details.

The license fee includes ALL initial and ongoing installation, training and technical support, product updates, letterhead set-up and minor template customizations<sup>1</sup>. Your firm will never pay for any kind of support or training (except for travel costs for out-of-town on-site visits).

## System Requirements

ACL is compatible with Microsoft Word 2000 through 2007. WordPerfect is not supported. Workstations running Microsoft .NET Framework v2.0 and either Windows XP with minimum 512 MB or Vista with minimum 1 GB RAM. ACL requires a server running SQL Server 2000 or better. Note: SQL Express is available from Microsoft as a free download.

## Why Use ACL?

- It's very fast. In fact, there is no faster way to assemble court forms and letters. You'll be more efficient and complete work in much less time.
- It's very easy. Every court form and letter is right at your fingertips, in organized menus.
- It's always up-to-date in accordance with the current *Rules of Civil Procedure*.
- ACL reduces errors by reducing the need for cutting & pasting.
- ACL produces professional and uniformly formatted documents.
- ACL is fully customizable. Firms can add their own precedent clauses (Pleadings, Motions, Releases, and Letters).
- ACL is very user-friendly, yet feature rich.
- All initial and ongoing training and support is included free-of-charge.
- All license fees are disburseable for cost recovery.
- ACL is now taught in Legal Assistant and Law Clerk courses at 14 Ontario Community Colleges.
- ACL is developed and supported by Korbitec Inc. – a world leader in document automation technology.

## Why NOT Use ACL!

<sup>1</sup> Substantial template and dialog customizations (i.e. custom pleadings) will be quoted separately.
